Although many such perspectives exist in the field of clinical aphasiology, which indeed are not necessarily mutually exclusive, they appear to fall basically into two main categories. The first includes those who view the language system as a set of rule-governed principles, driven by internal processes, existing within an individual (the ...

A standardized rule-based scoring system, the Correct Information Unit (CIU) analysis, was used to evaluate the informativeness and efficiency of the connected speech of 20 non-brain-damaged adults and 20 adults with aphasia in response to 10 elicitation stimuli. The interjudge reliability of the scoring system proved to be high, as did the session-to-session stability of performance on measures.
