Welcome to the home of the Domestic Renewable Heat Incentive (RHI). Follow the links below to find out if it's for you and how to apply. If you're an existing participant you can view your information by logging in to MyRHI.

### **Domestic Renewable Heat Incentive | Ofgem**

Water heating is a heat transfer process that uses an energy source to heat water above its initial temperature. Typical domestic uses of hot water include cooking, cleaning, bathing, and space heating. In industry, hot water and water heated to steam have many uses.. Domestically, water is traditionally heated in vessels known as water heaters, kettles, cauldrons, pots, or coppers.

Essential information on the purpose, aim and history of the Domestic Renewable Heat Incentive (RHI) administered by Ofgem.

### **About the Domestic RHI | Ofgem**

Heating, ventilation, and air conditioning (HVAC) is the technology of indoor and vehicular environmental comfort. Its goal is to provide thermal comfort and acceptable indoor air quality. HVAC system design is a subdiscipline of mechanical engineering, based on the principles of thermodynamics, fluid mechanics and heat transfer. "Refrigeration" is sometimes added to the field's abbreviation, as ...

Solar water heaters -- also called solar domestic hot water systems -- can be a cost-effective way to generate hot water for your home. They can be used in any climate, and the fuel they use -- sunshine -- is free.

High capital costs for renewable energy systems (such as biomass or heat pumps) are holding back mainstream take-up, although Government incentives can more than pay back this initial cost over seven years.. The best system to choose depends largely on the amount of heat energy your home will need and how your system is set up (e.g. with underfloor heating).

Never use mechanical heating and cooling as a substitute for good design. However, for existing homes, installation of high efficiency heating and cooling technologies, with modest building improvements and behaviour change, may be cheaper options to reduce energy bills and greenhouse gas emissions than major home renovations.
