It is very common for babies to be fussy and nurse very often in the evenings, particularly in the early months. My daughter had a fussy time every evening for a couple of months (yes, it does go away!). I spent weeks camped out on the end of the sofa with a constantly nursing and/or fussy baby every evening from about 6 to 10 PM...

How long will it take for an elimination diet to work? Once a mother has excluded the trigger food from her diet, her baby's symptoms may start to improve within three to four days (ABM, 2011) however it can take two to four weeks to see improvement 8. This is likely to be associated with the time taken for any existing inflammatory reactions to settle down in the baby rather than the time ...

The 1940s were all about rationing, protein stretching, substitutions, rediscovering "grandma's foods", and making do with less. Home cooks made sugarless cookies, eggless cakes, and meatless meals. Cookbooks, magazines, government pamphlets, and food company brochures were full of creative ideas for stretching food supplies.
