Montana Field Guide contains a wealth of information about Montana's diverse species.

### **Moose - Montana Field Guide**

This species is not migratory but may move seasonally following migrating ungulates within its territory. Gray Wolves also disperse widely. Males in northwestern Montana can move an average of 113 km (70 miles) from their natal territory, and females 77 km (48 miles), before establishing a new territory or joining an existing pack (Boyd and Pletscher 1999).

6.1 Temperature Temperature must be measured in situ because a water sample will gradually reach the same temperature as the surrounding air. If it is not possible to measure the temperature in situ, a sample must be taken from the correct location and depth of the sampling station and its temperature measured immediately it is brought to the surface.
