IPv4 address exhaustion is the depletion of the pool of unallocated IPv4 addresses. Because there are fewer than 4.3 billion addresses available, depletion has been anticipated since the late 1980s, when the Internet started to experience dramatic growth. This depletion is one of the reasons for the development and deployment of its successor protocol, IPv6.

IPv4 address exhaustion - Wikipedia

We think it's time to change that, though. So in honor of World Mental Health Day, WeAreTeachers is working to change the dialogue about teacher mental health. Below are some of the top challenges people give for not seeking therapy, or even basic self-care, along with possible solutions and workarounds for each one.

A creature that is taking bleed damage takes the listed amount of damage at the beginning of its turn. Bleeding can be stopped by a DC 15 Heal check or through the application of any spell that cures hit point damage (even if the bleed is ability damage). Some bleed effects cause ability damage or even ability drain.
