Lung Cancer - Non-Small Cell: Introduction | Cancer.Net

Lung Cancer: Introduction. Like many other types of cancer, lung cancer is capable of spreading (metastasizing) to other parts of the body. In this case, cancer beginning in the lungs most commonly spreads to the brain, bones, adrenal glands and liver, via any of three mechanisms: direct extension, via the blood vessels, or via the lymph system.

Lung Cancer: Introduction - MentalHelp

What is lung cancer? Lung cancer is cancer that starts in the cells that make up the lungs. Many other types of cancer, such as breast or kidney, can spread (metastasize) to the lungs. When this happens, the cancer is not called lung cancer. This is because cancer is named for--and treatment is based on--the site of the original tumor.

Lung Cancer: Introduction - Health Encyclopedia ...

Information on prevention of Lung cancer comes from many sources. There are some sources that claim preventive benefits for many different diseases for various products. We may present such information in the hope that it may be useful, however, in some cases claims of Lung cancer prevention may be dubious, invalid, or not recognized in ...

Prevention of Lung cancer - RightDiagnosis.com

Lung cancer affects more than 200,000 Americans each year. About 10% to 15% of people with lung cancer have small cell lung cancer. Although cigarette smoking is the main cause of lung cancer, anyone can develop the disease. Lung cancer is treatable, no matter the size, location, whether the cancer has spread, and how far it has spread.

Lung Cancer - Small Cell: Introduction | Cancer.Net

Introduction to Lung Cancer. There are two major types of lung cancer: small cell lung cancer (SCLC)—which is also called oat cell cancer, because the cells resemble oat grains—and non-small cell lung cancer (NSCLC). The aggressiveness of the disease and treatment options depend on the type of tumor diagnosed.

Introduction to Lung Cancer | SEER Training

Introduction. The rate of death from cancer continues to decline among both men and women, among all major racial and ethnic groups, and for the most common types of cancer, including lung, colon, breast, and prostate cancers. The death rate from all cancers combined continues to decline, as it has since the early 1990s.

Introduction | Cancer Trends Progress Report

Lung Cancer Prevention and Early Detection. Lung cancer is the second most common cancer in both men and women (not counting skin cancer), and is by far the leading cause of cancer death among both men and women. Each year, more people die of lung cancer than of colon, breast, and prostate cancers combined.

Lung Cancer Prevention and Early Detection
