In this review, we have discussed recent advances of metabolomics analysis in eye research, with emphasis on ocular diseases. As shown from the above cited studies, ocular biofluids (aqueous humor, vitreous humor and tears) and tissue samples are valuable biological matrices in studying ocular diseases.

The Latest Research on Dry Age-Related Macular Degeneration. In the early form, patients have tiny deposits under the retina, called drusen, which indicate they may lose vision in the future if the disease progresses to the late stage. Patients with late, dry AMD have a form called geographic atrophy (GA), when the vision cells (photoreceptors)...
