The Apollo program was the successful U.S. effort to land men on the Moon and return them safely to Earth.

Research Starters: The Moon and The Sun - Scholastic

In physics, redshift is a phenomenon where electromagnetic radiation (such as light) from an object undergoes an increase in wavelength. Whether or not the radiation is visible, "redshift" means an increase in wavelength, equivalent to a decrease in wave frequency and photon energy, in accordance with, respectively, the wave and quantum theories of light.

Redshift - Wikipedia

There Once Was a Sky Full of Stars by Bob Crelin and Amie Ziner (illustrator) 34 pages, April 2006 Highly Recommended. Description: Here's a perfect bedtime story to both entertain and educate children about the effects of light pollution. Poetic and lyrical, this beautifully illustrated book helps children discover the magic of the night sky while learning about the growing problem of light ...

What is The Space Review? The Space Review is an online publication devoted to in-depth articles, commentary, and reviews regarding all aspects of space exploration: science, technology, policy, business, and more.

The Space Review: essays and commentary about the final ...

Oh, Werner von Braun had it all figured out in 1952. In six issues of Collier's magazine he laid out a plan to send men to Luna and Mars. First you build a space ferry as a surface to orbit cargo transport (which was the great-grandfather of the Space Shuttle). Then you use it to make a space station. And it was going to be a beauty of a space station, too.
